RELEASE NOTES

Exo Iris®

Version 3.3 Mobile

INTRODUCTION

Exo Iris® is a category-redefining 3-in-1 handheld ultrasound device offering a complete medical imaging ecosystem for use anywhere. Powered by our proprietary silicon technology, Iris integrates advanced imaging, intuitive workflow and real-time artificial intelligence (AI) to deliver immediate answers at the point of care.

WHAT'S NEW

Imaging Improvements

- **Lung:** Sharper resolution in the near and mid-field, with improved visualization of lung sliding in the near field.
- **Abdomen:** Sharper resolution in near-field.
- **Cardiac:** Improved contrast resolution and noise reduction.

Post-Capture Editing

- Added capabilities to measure and annotate saved images and clips.

OB Measurements

- The OB calculations package now includes Deepest Vertical Pocket (DVP), Internal Os Distance (IOD), and Amniotic Fluid Index (AFI) measurements.
- The Estimated Fetal Weight (EFW) report also calculates the Estimated Due Date (EDD).

Shutter Button Actions

- Customize how the shutter button saves images and clips.

Expanded iPad Compatibility

- Exo Iris now supports iPad mini (A20 Pro).

RELEASE NOTES

Exo Iris®

Version 3.3 Mobile

WHAT'S FIXED

- Tapping outside the patient list window while it's open no longer causes the UI to become unresponsive.

KNOWN ISSUES

- If the internet connection is unstable, exams in transit to the PACS may remain in the Outbox. Restart the Exo Iris app to resume the upload.

RELEASE NOTES

Exo Works®

Version 3.3 Web and Mobile

INTRODUCTION

Exo Works® is an intuitive POCUS workflow platform designed for clinicians. It helps physicians document and bill exams quickly and easily manage QA from anywhere.

WHAT'S NEW

Keep Exam Transfers on Track

- In Connect and Enterprise, signed exams remain in the Outbox until successfully transferred to the EHR or PACS. Credentialed users can track and retry their own failed transfers, while Specialty Admins can monitor pending transfers and retry failed deliveries across their specialty.

Stay Informed on Exam Delivery

- View EHR and PACS transfer statuses directly on exam cards and in list views.

Tailor Documentation to Your Specialty

- Specialty Admins can enable or disable worksheets for each specialty, helping clinical teams focus on the documentation most relevant to their practice.

Find Patients Faster

- Search for patients by name, medical record number (MRN), or both in encounter-based workflows.

Rename Exam Types

- Admins can rename exam types without recreating their associated worksheets or configurations.

Version 3.3 Web and Mobile

WHAT'S NEW (Continued)

Customize Worksheets with Greater Flexibility

- Edit and save existing custom worksheets without creating additional copies. Use "Save as..." to create new worksheets while preserving the originals, or customize Exo-provided templates to fit your team's needs.

Simplify User Reporting

- Export user lists to CSV for easier recordkeeping, auditing, and administrative reporting.

Keep Patient Information Up to Date

- In encounter-based workflows, patient demographics and MRN updates sync automatically from the EHR.

Find and Organize Exams Faster

- Sort exam lists by column in ascending or descending order.

WHAT'S FIXED

- For customers on the legacy Essential license, only the selected PACS connection is now marked as the default in the mobile app, including after signing out and signing back in.
- In Connect and Enterprise, Exo Iris Settings now displays all worklists configured for the user's specialty when online.

Exo Works®

Version 3.3 Web and Mobile

KNOWN ISSUES

Web App:

- When assigning specialty-based roles using the "Bulk Edit" action in User Management on the Exo Works Admin page, the "All" option for Exam Types is not selected by default.
  Workaround: If access to all exam types is intended, manually select "All" before saving.

- An error may occur when removing the Specialty Admin role from a user in Exo Works Admin.
  Workaround: The Customer Admin can assign the user the Facility Admin role, then remove the Specialty Admin role from the User Information page.

- In Connect and Enterprise, navigating away while editing a custom worksheet on the Admin page may discard unsaved changes without displaying a confirmation.
  Workaround: Save changes before leaving the worksheet editor.

Web and Mobile App:

- Exams may remain visible in the Outbox after a successful transfer, with the previous transfer status displayed until the exam list is refreshed.
  Web Workaround: Refresh the page to view the latest status.
  Mobile Workaround: Navigate away from the Outbox and reopen it to refresh the status.

- In Connect and Enterprise, an Organization Admin assigned Facility Admin and Specialty Admin roles may not receive a welcome email during provisioning.
  Workaround: The Customer Admin can resend the welcome email from Exo Works Admin, allowing the affected user to set up their password and log in.

SmartLink:

- SmartLink does not currently display whether a specialty is active or inactive.
  Workaround: Admins can view each specialty's status on the Exo Works Admin page.
